Subject: International payment transfers

Dear mister Vorenhout,

With reference to our telephone conversation today you asked us to give you some information about international payment transfers. For payment transfers from abroad to your bank account with the Triodos Bank in the Netherlands the following codes should be included:

- The BIC code. This is the bank code of the Triodos Bank. The BIC code is also called the SWIFT code. The BIC/SWIFT code of the Triodos Bank is TRIONL2U
- The IBAN code. This is your International Bank Account number. Every customer of an European bank has an IBAN number. Your IBAN code is NL86 TRIO 0786 7175 72

European banks do not work with ABA or routingnumbers. Therefore you do not need an ABA or routing number to transfer money to your Triodos account.

The address of our office in Zeist ,Holland is:
